Date	Description	Amount (s)	Balance (s)
09 May	ATM withdrawal: Mars Station	-259,200	50,681,546
	The machine at Mars Station dispenses sols from a drawer fitted before the station had its first oxygen plant, and nobody has asked it to change its stock. Your withdrawal was paid from that drawer, which the custodian describes as sound. Ref. CIBT-3013-7077-2		
11 May	Deposit: Hall E	+2,058,491	52,740,037
	The line for this deposit showed the holder's name one letter short, because the slip had been torn at the corner by a careless hand. The name has been restored. The Bank notes that a holder's own name is not the sort of thing one should lose at a corner, and has said so to the corner. Ref. CIBT-3013-2BD7-8		
18 May	ATM withdrawal: Mars Station	-259,200	52,480,837
	For the auditors: the withdrawal is entered once, although the Mars Station machine printed two receipts. The machine has been asked to say so as well, and has agreed in writing. Ref. CIBT-3013-695A-8		
23 May	Payroll credit: the Lagrange Four Commissary	+340,372	52,821,209
	This month's wage from the Lagrange Four Commissary waited 30 days at Mars Station, because the local office had a clerk on long leave and no one else held the key to the wage drawer. The drawer was opened on the 23rd, and the wage was counted out in full. Ref. CIBT-3013-3436-7		
31 May	Interest at 3.50% APY	+148,577	52,969,786
	Interest of 148,577 was rounded to the nearest hundredth of a second, the Bank's usual practice, and the hundredth not paid is carried forward without interest on it. The carried fraction has never amounted to a full second, and nobody has claimed it. Ref. CIBT-3013-D858-2

Balances accrue every second of every day by the Standard clock and are shown in Standard Galactic Seconds. Transfers between branches whose clocks disagree carry the slippage fee shown in the Daily Slippage Report for the day of transfer. Deposits are insured by the Temporal Deposit Insurance Corporation up to 10,000 years per depositor, per epoch.
