Date	Description	Amount (s)	Balance (s)
05 Oct	New Time™ exchange	+21,807	23,009,223
	Your recall was delayed 30 days because the freight from Kepler Ring carried the holding under the wrong seal. The seal was broken at the sorting shed, read, and found to be the holder's own, so the holding went on to the counter without further ceremony. Ref. CIBT-3019-F3C2-3		
10 Oct	Slippage fee (Kepler Ring, 3 transfers)	-900	23,008,323
	A crossing to the Kepler Ring lighthouse relay is charged in full, though the relay cannot see the lighthouse. The keeper reports the light each night and the Bank takes his word, since he has not once been wrong in 48 years at the post. Ref. CIBT-3019-EC0E-8		
28 Oct	Payroll credit: the Europa Ice Authority	+157,317	23,165,640
	Pay for 29 days was released late because the convoy that carried it from Kepler Ring waited at the crossing gate for a second escort. The convoy's leader writes that the wait was entirely proper, and the Bank agrees with the leader. Ref. CIBT-3019-A1B0-3		
28 Oct	Deposit: Hall E	+36,807	23,202,447
	You kept the sum under the mattress, on the wall side until the 28th, and the envelope came in with the shape of the hiding place still pressed into the paper. The counter has flattened it, filed the shape with the slip, and asked nothing. Ref. CIBT-3019-9A83-4		
31 Oct	Interest at 4.20% APY	+80,455	23,282,902
	The statement shows interest to the second. The balance itself is held to the tenth, so the figure printed is a rounding of the figure used. The difference goes to the Bank's favour in each month and to yours in each year, which is the arrangement the Bank describes as balanced. Ref. CIBT-3019-A401-9

Balances accrue every second of every day by the Standard clock and are shown in Standard Galactic Seconds. Transfers between branches whose clocks disagree carry the slippage fee shown in the Daily Slippage Report for the day of transfer. Deposits are insured by the Temporal Deposit Insurance Corporation up to 10,000 years per depositor, per epoch.
