Clock Pallas Ring 10 local

Opening balance	Credits	Debits	Closing balance
202,505,738 s	**+2,056,022 s**	**-14,444 s**	**204,547,316 s**

Date	Description	Amount (s)	Balance (s)
01 Nov	Turbulence Cover	-13,244	202,492,494
	Titan Methane Works has added its visitors to this policy by a rider and asks that the visitors' delays be claimed by the firm and not by them. The visitors have not been consulted, and the Bank has been asked to tell them when they arrive. Ref. CIBT-3024-F93B-5		
02 Nov	Deposit: Hall E	+147,188	202,639,682
	You fold the slip in three before it goes into the envelope, every time, and you have done so since the first slip on file. The counter can tell from across the hall whether a deposit is yours, and this one was. Ref. CIBT-3024-D542-4		
21 Nov	Payroll credit: Titan Methane Works	+1,098,812	203,738,494
	A standing credit from Titan Methane Works arrives on the 21st of each month, and it has been paid into 8564-1663-6749 since 3023. At each renewal one word on the advice slip has changed: "salary", then "wages", then "pay". The sum has not changed. Ref. CIBT-3024-385A-6		
29 Nov	Slippage fee (Luna, 4 transfers)	-1,200	203,737,294
	The 4 transfers were held on the bench beside the rate board, facing the window for 28 Standard days while a signal from the far side was confirmed twice, once to be sure and once because the first answer had come back too quickly to trust. Ref. CIBT-3024-9A8E-8		
30 Nov	Interest at 4.80% APY	+810,022	204,547,316
	The 30th credit was held while the Rate Committee sat through an afternoon of minutes on whether the rate should be stated to two places or three. It was agreed at two places, and the interest was paid to three. Ref. CIBT-3024-F47D-6

December 3023 November 3024

Balances accrue every second of every day by the Standard clock and are shown in Standard Galactic Seconds. Transfers between branches whose clocks disagree carry the slippage fee shown in the Daily Slippage Report for the day of transfer. Deposits are insured by the Temporal Deposit Insurance Corporation up to 10,000 years per depositor, per epoch.
