Date	Description	Amount (s)	Balance (s)
02 May	Payroll credit: Harbourfront Shipping	+219,762	61,868,493
	The Harbourfront Shipping pay reached Mars Station, a branch that had been closed for 29 days, so the Bank held the credit in its night safe until the branch could take it in. It was posted on the morning it could be, with the interest it had earned while it waited. Ref. CIBT-2962-7059-4		
02 May	ATM withdrawal: Mars Station	-86,400	61,782,093
	The statement previously read 86,400 as the sum withdrawn. That was the sum requested. The sum paid was One Standard day, and the difference was never taken from your balance, so the figure on this line is the one to keep. Ref. CIBT-2962-EA82-1		
11 May	Slippage fee (Mars Station, 1 transfers)	-600	61,781,493
	The fee was charged in seconds. The officer says that is the right unit for a crossing and the wrong unit for an apology, and that the relay has not yet offered one. Ref. CIBT-2962-EB34-9		
16 May	ATM withdrawal: Mars Station	-86,400	61,695,093
	You read the receipt aloud at the Mars Station machine, once, in a voice intended for nobody, and fold it into the wallet with the corner turned down. The printer has begun to run a little more slowly on your days, which the officer takes as an accident of the printer's. Ref. CIBT-2962-EF84-8		
18 May	Transfer to own account: Mars Station	-1,659,788	60,035,305
	Transfer between your own accounts at Hall E and Mars Station, as instructed. Ref. CIBT-2962-4792-5		
31 May	Interest at 4.80% APY	+246,594	60,281,899
	The rate on the previous statement was shown as 4.80% APY. The rate in force on the first of the period was the correct one, and the difference of 4 seconds of interest has been credited to this line. Ref. CIBT-2962-9087-7

Balances accrue every second of every day by the Standard clock and are shown in Standard Galactic Seconds. Transfers between branches whose clocks disagree carry the slippage fee shown in the Daily Slippage Report for the day of transfer. Deposits are insured by the Temporal Deposit Insurance Corporation up to 10,000 years per depositor, per epoch.
