Opening balance	Credits	Debits	Closing balance
103,026,031 s	**+1,447,760 s**	**-2,615,982 s**	**101,857,809 s**

Date	Description	Amount (s)	Balance (s)
03 May	Payroll credit: Harbourfront Shipping	+1,104,340	104,130,371
	The largest single credit this branch has handled this year came from Harbourfront Shipping. The Teller asks that it not be mentioned at the counter, and has said so in writing, which is the only instruction on your file that she has ever given that way. Ref. CIBT-2947-1127-7		
17 May	ATM withdrawal: Oakland Sector	-259,200	103,871,171
	At Oakland Sector the machine asks for your name in the local language and then in ours. It dispensed 0.958 day, and the balance went out in our seconds, both figures appearing on the line. Ref. CIBT-2947-7007-0		
24 May	Turbulence Cover	-17,984	103,853,187
	Turbulence Cover on the cable car was introduced in 2944 and has been paid every month since, for delays nobody has yet been able to see. The underwriters say they will go on insuring what they cannot see, which is the whole method of the cover. Ref. CIBT-2947-3AB9-3		
27 May	Transfer to own account: Oakland Sector	-2,338,798	101,514,389
	Oakland Sector asked us to record that the item was received on its local 27th, which fell on a day its own calendar does not keep. It has been entered on the nearest day both calendars agree on, and the office is content. Ref. CIBT-2947-1B25-2		
31 May	Interest at 4.00% APY	+343,420	101,857,809
	At the firm's request, the Harbourfront Shipping line is paid in days and converted at the close, since the firm keeps its books on that unit. The rounding goes to the firm, which has asked us not to mention it. Ref. CIBT-2947-64E0-7		

Closing balance, month by month

June 2946 May 2947

Balances accrue every second of every day by the Standard clock and are shown in Standard Galactic Seconds. Transfers between branches whose clocks disagree carry the slippage fee shown in the Daily Slippage Report for the day of transfer. Deposits are insured by the Temporal Deposit Insurance Corporation up to 10,000 years per depositor, per epoch.
