Date	Description	Amount (s)	Balance (s)
04 May	Deposit: Hall E	+1,493,706	25,046,092
	The Ganymede desk sends deposits in a tube of its own design, which the window opens before two officers and a relay operator. The sum arrives in days, is converted at the posted rate and credited, and the tube is the only part of the transaction anybody admires. Ref. CIBT-2986-A98C-2		
10 May	Turbulence Cover	-17,059	25,029,033
	Filed from the car on the left, the claim describes a delay that the passenger in the car on the right, level with it for twelve minutes, says was theirs. The carriers agree the cars were level, and the claim is paid on the left. Ref. CIBT-2986-A5DA-8		
14 May	ATM withdrawal: New Orleans Sector	-172,800	24,856,233
	The officer at the Hall E desk notes that you took the cash in small denominations. The Bank prefers this form and would be grateful to see it more often. Ref. CIBT-2986-D2F6-9		
17 May	ATM withdrawal: New Orleans Sector	-259,200	24,597,033
	Each fortnight 0.953 days are drawn at New Orleans Sector for the lending library at Pallas Ring 10, and returned on your next visit. The officer enters the two lines side by side, so that neither one is mistaken for a gift. Ref. CIBT-2986-86A9-9		
31 May	Interest at 3.80% APY	+74,582	24,671,615
	On the New Orleans Sector side of the account the interest is computed on the local clock and carried across by relay, so the balance here is always a little younger than the one there. The Bank has been asked to age it, and has declined, on the grounds that interest does not age. Ref. CIBT-2986-DBC7-3

Balances accrue every second of every day by the Standard clock and are shown in Standard Galactic Seconds. Transfers between branches whose clocks disagree carry the slippage fee shown in the Daily Slippage Report for the day of transfer. Deposits are insured by the Temporal Deposit Insurance Corporation up to 10,000 years per depositor, per epoch.
