Date	Description	Amount (s)	Balance (s)
06 Aug	ATM withdrawal: Phobos	-259,200	22,635,775
	You told the Bank in 2994 to draw 3 Standard days on the first Standard day of each quarter. It has been drawn on every quarter since, including the one when the concourse was closed for a holiday and the cash came from the next machine along. Ref. CIBT-2997-84DA-0		
13 Aug	Deposit: Hall E	+271,608	22,907,383
	Notes totalling 271,608 were checked at the Hall E window. The Teller observed, to nobody in particular, that they had been folded by someone with a clear view of their future. Ref. CIBT-2997-4E19-6		
14 Aug	Payroll credit: Brymar College	+172,241	23,079,624
	The credit from Brymar College, sent through Phobos, was struck in sols, rounded down to the whole, and converted at the rate posted for the day of the crossing. It was then kept in the second cubby, with the spare rubber bands until the local morning arrived. Ref. CIBT-2997-E241-9		
18 Aug	ATM withdrawal: Phobos	-172,800	22,906,824
	You asked the Bank to say which way the withdrawal had been rounded. It was rounded both ways, once by the machine and once by the Bank. The two roundings came to 0.945, and the Bank has kept neither. Ref. CIBT-2997-F8A1-9		
28 Aug	Turbulence Cover	-25,742	22,881,082
	The Ceres relay honours this policy for delays of its own making, and has asked the Bank to say so on the form, which it has done in a neat hand. Ref. CIBT-2997-5952-2		
31 Aug	Interest at 3.80% APY	+72,500	22,953,582
	The charge for carrying a fraction of a second from one period to the next has been waived. The fraction is too small for the paperwork to be worth the carrying, and the paperwork has been dropped. Ref. CIBT-2997-AC7D-4

September 2996 August 2997

Balances accrue every second of every day by the Standard clock and are shown in Standard Galactic Seconds. Transfers between branches whose clocks disagree carry the slippage fee shown in the Daily Slippage Report for the day of transfer. Deposits are insured by the Temporal Deposit Insurance Corporation up to 10,000 years per depositor, per epoch.
