Opening balance	Credits	Debits	Closing balance
50,053,332 s	**+581,991 s**	**-407,238 s**	**50,228,085 s**

Date	Description	Amount (s)	Balance (s)
09 Aug	ATM withdrawal: Singapore Sector	-259,200	49,794,132
	The machine at Singapore Sector keeps the local day, so your withdrawal was logged there before the 9th had begun at the Head Office. The date on this line is ours; the time on the receipt is theirs. Ref. CIBT-2938-653B-8		
13 Aug	Slippage fee (Singapore Sector, 4 transfers)	-3,600	49,790,532
	The fee on the crossings from the Ceres Ring Assay Office was taken from the payroll credit before it was split, so the staff transfer scheme paid it in full. The scheme's officer asks that it be recorded as a payroll charge, which it has been, under a heading nobody has used since 2935. Ref. CIBT-2938-F10B-7		
26 Aug	Transfer to own account: Singapore Sector	-144,438	49,646,094
	This sundry sat 28 days at the Singapore Sector desk while its officer finished a long exchange with a relay that would not stop explaining its own clock. The exchange ended on the 26th, and the sundry was sent on that afternoon. Ref. CIBT-2938-B4C3-0		
30 Aug	Payroll credit: the Ceres Ring Assay Office	+381,778	50,027,872
	The Teller records that you asked for the credit in the smaller notes, then asked for it to be counted again, and that this is the only such request the branch has received this year. Ref. CIBT-2938-832C-8		
31 Aug	Interest at 4.80% APY	+200,213	50,228,085
	The branch at Callisto posts interest against its own day, which is longer than ours by a margin the local desk describes as customary. The line falls two days after the one you would expect, and it is in the right place. Ref. CIBT-2938-BD55-4

September 2937 August 2938

Balances accrue every second of every day by the Standard clock and are shown in Standard Galactic Seconds. Transfers between branches whose clocks disagree carry the slippage fee shown in the Daily Slippage Report for the day of transfer. Deposits are insured by the Temporal Deposit Insurance Corporation up to 10,000 years per depositor, per epoch.
