Opening balance	Credits	Debits	Closing balance
56,475,439 s	**+607,679 s**	**-2,657,138 s**	**54,425,980 s**

Date	Description	Amount (s)	Balance (s)
07 Aug	Payroll credit: the Ceres Ring Assay Office	+381,778	56,857,217
	The pay was delayed by a dock inspector's lunch, which ran past the window's opening and into the hour the window was meant to be closed. The lunch was long, the inspector was thorough, and the wage was posted on the first afternoon the inspector came back. Ref. CIBT-2987-0560-1		
23 Aug	Slippage fee (Vancouver Sector, 2 transfers)	-1,800	56,855,417
	Filed for the audit: the 2 crossings were checked against the relay's log on the 23rd, and the relay's log was checked against a second log kept in a drawer at the relay. The two agree to the second, and the second log is found to have been kept by the first one's author. Ref. CIBT-2987-7771-2		
30 Aug	ATM withdrawal: Vancouver Sector	-172,800	56,682,617
	Dispensing took longer than usual because the machine read your card twice, once for each world it had been told you might be on. The second reading agreed with the first, and the withdrawal is correct. Ref. CIBT-2987-37C7-6		
30 Aug	Transfer to own account: Vancouver Sector	-2,482,538	54,200,079
	The quarterly sundry for the pens kept at the Hall E counter is charged to whoever signed the slip last. This quarter it was you, at 0.30 seconds, which the officers consider fair for pens that have never once run out. Ref. CIBT-2987-D3AD-0		
31 Aug	Interest at 4.80% APY	+225,901	54,425,980
	The rate was applied to the balance and the product rounded down, always and never up. A second owed is a second kept, and this statement was drawn on that view. Ref. CIBT-2987-BD26-6

September 2986 August 2987

Balances accrue every second of every day by the Standard clock and are shown in Standard Galactic Seconds. Transfers between branches whose clocks disagree carry the slippage fee shown in the Daily Slippage Report for the day of transfer. Deposits are insured by the Temporal Deposit Insurance Corporation up to 10,000 years per depositor, per epoch.
