Date	Description	Amount (s)	Balance (s)
02 Jul	Slippage fee (Oakland Sector, 6 transfers)	-5,400	67,461,699
	Filed for the audit: the 6 crossings were checked against the relay's log on the 2nd, and the relay's log was checked against a second log kept in a drawer at the relay. The two agree to the second, and the second log is found to have been kept by the first one's author. Ref. CIBT-2989-9DF6-9		
03 Jul	Deposit: Hall E	+80,665	67,542,364
	The rate used to convert this deposit was posted at the opening bell and held until the window closed, which the Bank considers the fair way to treat a rate that cannot make up its mind. The sum, rounded to the second, is 80,665. Ref. CIBT-2989-449C-8		
11 Jul	Payroll credit: the Ceres Ring Assay Office	+381,778	67,924,142
	A wage that falls exactly on the half second is rounded to the even second, as the Bank rounds everything it cannot otherwise decide. The wage from the Ceres Ring Assay Office fell on the half this time and was rounded down. Ref. CIBT-2989-6E3F-4		
26 Jul	ATM withdrawal: Oakland Sector	-86,400	67,837,742
	Housed in a dome, the machine at Oakland Sector has a slot that freezes in the cold season. The branch has fitted a heater, and describes it in its records as a fixture. Your withdrawal was made after the thaw and posted without delay. Ref. CIBT-2989-42B0-6		
31 Jul	Interest at 4.80% APY	+269,868	68,107,610
	Every quarter you ask what the interest would have been if it had been paid out, a question the Bank answers in full and that you have never acted on. The answers are kept in a folder with your name on it, and the folder is getting thick. Ref. CIBT-2989-41B8-3

Balances accrue every second of every day by the Standard clock and are shown in Standard Galactic Seconds. Transfers between branches whose clocks disagree carry the slippage fee shown in the Daily Slippage Report for the day of transfer. Deposits are insured by the Temporal Deposit Insurance Corporation up to 10,000 years per depositor, per epoch.
